

THE PAIN VET

by canine arthritis management

Direct coaching from leading veterinary experts who work with your team to tailor a management plan to suit your client's and patient's lifestyle and needs

HOW WE CAN HELP YOU...

We support your clients' broader needs with minimal time investment from your practice — while maximising your benefits, as all prescriptions and services continue to go through you.

We give you access to leading experts in the field, allowing you to learn from the detailed, insightful reports we create for both you and your client.

We take the pressure off your team while indirectly training and empowering you to expand your service provision, build confidence, and deliver even greater client care.

The Pain Vet offers a one-of-a-kind, expert-led service that gives pet caregivers personalised, one-on-one consultations to help manage their pet's chronic pain.
